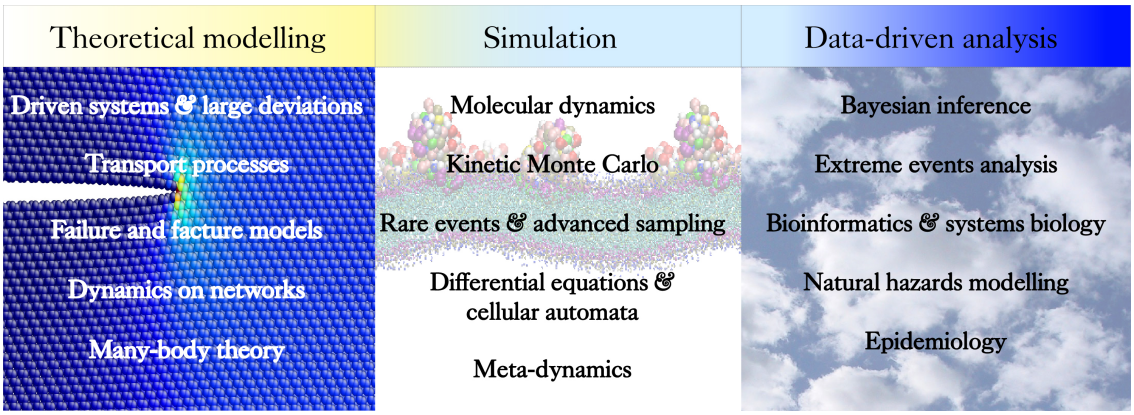
EPSRC
Pioneering research and skills

KING'S College LONDON

EPSRC Centre for Doctoral Training in

Cross-Disciplinary Approaches to Non-Equilibrium Systems (CANES)

10 fully-funded 4-year PhD studentships
King's College London
Apply by* **28 April 2014** for Sept 2014 entry



Non-equilibrium processes underpin many challenging problems across the sciences. The mission of CANES is to train a new generation of researchers in cross-disciplinary approaches to non-equilibrium systems. CANES draws on a vast range of supervisor expertise in Mathematics, Physics, Chemistry, Informatics, Computational and Systems Biomedicine, Earth and Environmental Sciences.

- Training courses in the first year leading to an MSc
- Stipend for living expenses, £15,863 per year
- Additional conference travel funds
- Industrial and academic partners and internships
- Open question sandpits and annual retreats
