

Saturday, August 27, 2016

9:00 – 11:45	Section XII	PIPT - optics	Chair: R. Shimano
9:00 – 10:20	Search for photo-induced phase transition with ultrafast response based on electronic-structural coupled probes <i>S. Koshihara, Tokyo Institute of Technology, Japan</i>		
10:20 – 10:50	Coffee		
10:50 – 11:10	Nanoscale picture of ultrafast switching to hidden state in 1T-TaS ₂ <i>Ya. A. Gerasimenko, Jozef Stefan Institute, Slovenia</i>		
11:10 – 11:40	Dynamical phase transition to the excitonic insulator state induced by an optical pulse. <i>N. Kirova, Université Paris-Sud, CNRS, France</i>		
11:40 – 12:10	Closing the 1th week		
12:15 – 14:30	Lunch
